

Applelec Eco Light Box

Key Features:

Lightweight
1sqm = 4.2kg

Environmentally
friendly components

Slimline 32mm
profile

100% recyclable

Interchangeable
skins

1 tree planted
per order

Recycled bottle skin

Our Eco Lightbox skin offers the same vibrant, quality finish, but in a more sustainable way.

- Manufactured from recycled polyester yarn created from 100% recycled PET plastic bottle waste (2 bottles per square metre)
- Printed with water-based inks
- Non toxic

Wood-pulp backing

This environmentally friendly alternative to rigid plastic not only reduces the overall weight of the lightbox but is

- 100% recyclable as paper waste
- 100% fibre based
- High strength, rigid
- PEFC certified
- Withstands store conditions inc. varying temperature & humidity
- Natural starch adhesive
- Manufactured using locally sourced PEFC wood
- No bleaching or chemicals
- Environmentally friendly production using closed loop water to conserve natural resources, heat recovery systems and hydro plants

SloanLED[®]
Leaders in LED Technology

Highly, energy efficient BrightLINE 2 LP SloanLED's

Features prism lens technology which captures otherwise wasted light and redirects it towards the illuminated surface, providing wide, even illumination and a massive increase in efficacy.

Key features:

- 24v
- 50% higher efficacy
- 163 lumens per watts
- High output
- Quality components
- Ideal for shallow lightboxes 40mm deep and below
- Balances brightness and spacing for incredible loading of 44 (long) sticks per 100w power supply
- Maintains colour consistency
- 5 year parts & labour warranty
- Available in 4000k & 6500k to match skin tones for retail displays
- WEEE regulated

Improves:

- Energy efficiency
- Brightness
- Longevity
- Output

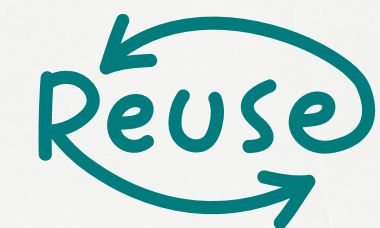

Lightbox frame

This slimline profile requires less material and is manufactured from either stainless steel or aluminium, meaning they are 100% recyclable

Designed for disassembly

No glue, just aluminium clips and screws to allow you to easily disassemble, and either reuse or recycle at the end of the products life.

We plant a tree with every eco order

JUST ONE Tree can:

- Intercept 15,000 litres of rainfall, reducing erosion and flooding
- Provide a habitat and food for 1000's of animals and insects
- Captures 20kg or carbon per year and 1 tonne in its lifetime
- Purifies the air
- Purifies the soil
